

COMPANY PROFILE

ABOUT US

Nevira Minerals Limited is a limited general merchandise trading company that was incorporated in Kenya on 30th March 2016 as limited company under registration number PVT 201 6/00776.

Nevira Minerals Company Ltd main business is mining and processing of natural minerals into value added industrial and agricultural minerals.

Our vision is to be a leading supplier of industrial minerals and value-added products to the burgeoning construction, chemical and agricultural industries in Kenya and larger East African region (Kenya, Tanzania, South Sudan, Uganda, Burundi and Rwanda with a total population of over 180 million people). We intend to achieve this by seeking to grow innovatively producing new and value added products stemming from natural minerals within our locality.

The company operates an a modern processing plant in the mineral rich county of Kajiado, some 105 km from Nairobi City and 166 km from Arusha in Tanzania. With state of the art milling units, we guarantee sustainable competitiveness in the markets by ensuring our customers enjoy top quality services and product in a timely manner.

We have commissioned three quarries in Kajiado County i.e. Kumpa and KMQ Quarries which guarantees continuous supply of raw materials.

Our operations are overseen by core team of Sales and marketing, quality assurance, mining, electrical and mechanical engineers with over 40 years of cumulative experience working in similar positions in multinational mining companies in Kenya.

“To be a leading supplier of industrial minerals and value-added products to the burgeoning construction, chemical and agricultural industries in Kenya and larger East African region”

CODE OF CONDUCT

Nevira's commitment is to work ethically in every aspect of business. We offer equal and fair opportunities to all our employees.

Nevira endeavours to continuously improve our operations, products and services.

Our Mantra of Same day delivery, no pending order continues to be our goal that Nevira strives to realise during our operations.

Nevira provides a complete Code of Conduct and Ethics Manual to its employees.

It give emphasis to values and encourages employees to incorporate those values into their working environments. As a practical and clear guide to the behaviour that the company expects from everyone, the Code deliberately sets consistent and high standards for all employees regardless of the position

MISSION

Be a leading supplier of industrial minerals and value-added products to the burgeoning construction, chemical and agricultural industries in Kenya and larger East African region (Kenya, Tanzania, South Sudan, Uganda, Burundi and Rwanda with a total population of over 180 million people).

VISION
